

A

IC methylation by physical allele

B

Per-CpG parent-of-origin contrast across the PWS-AS IC

C

Observed diagnostic state by mechanism

	Expected	Observed	Call
PWS-DEL (n=5)	M / absent	M / absent	paternal deletion
PWS-mUPD (n=1)	M / M	M / M	maternal UPD (duplicated maternal state)
AS-DEL (n=3)	absent / P	absent / P	maternal deletion
Control (n=2)	M / P	M / P	canonical biparental state

D

Coverage and phasing support at the PWS-AS IC
